

Learning Overview, Homework and Events.

Week Beginning 30th September 2024 and Events for Year 1 and 2

Maths

This is our first week on a new sequence of Addition and Subtraction. We will be looking at recalling number bond facts to 10 (to 20 for Year Twos). We will also be learning to add and subtract 1 digit numbers, with the Year Twos moving onto using 2 digit numbers.

Number Sense Year 1

The year 1s are continuing to use the tens frame to recognise the numbers up to 10 on a tens frame quickly and without counting them.

Number Sense Year 2

The Year 2s have been using the tens frame to recognise numbers to 10 quickly and efficiently (so trying not to count them 1 by 1)

Weekly Diary Dates and Events

Please can children wear their PE kits to school on **Wednesday 2nd October**

Please remember reading folders every day as we will be using them during our RWInc sessions.

RWInc parent information session - Tuesday 8th October, More information to follow.

Homework

Reading

We will be sending home our new RWInc books with most children in Year 1 and 2. Those who need consolidation of set 1 sounds will have these to practise at home instead of a book. We would encourage you to read a book to your child instead. For children who are taking a book home, this will be something they have read during the week in their RWInc group so it is a celebration of what they can now read fluently. Children develop fluency by practising reading a book more than once. We will also be posting some RWInc videos on Seesaw that your child can do at home. We will be organising an information evening where we can explain more about RWInc and how you can support your child at home.

Maths

We will be having a weekly arithmetic test on a Friday please support your child by encouraging them to practise and become fluent with their facts. This will be based on the number sense activity we are doing. If you want to do anything in addition then please practise number facts for numbers up to 10 and 20.

Number Sense – Year 1

At school we have been continuing to practice recognising numbers on the tens frame and making sure we recognise them even if they are orientated round a different way. We are continuing to practice recognising these numbers without counting them. Using the cards below, see if your child can do this quickly when you point to one of them. It will really make a difference to practice this so they know them really well!

Number Sense – Year 2

At school we have been learning to recognise how many items are laid out on a grid called a 'tens frame'. The tens frame is a grid that helps us see how many items there are without counting. Start by spending some time looking at the grids below to see which number your child recognises. When they don't recognise a number yet count the dots. Where there is a row of 5 dots encourage them to notice the 5 and not count them but to count on from that number. We have been working on subitising, this is where children recognise a number without counting.
